Park Doly

I shape the interface and build what sits beneath it.

- Fullstack development
- UI/UX design
- AI chatbots

Want the technical details? Ask for a walkthrough on GitHub.

Design and code, under one roof.

One partner from the first flow to the final deployment. Clear scope, a fixed end date, and no retainer you do not need.

Web product build

Next.js or React, design to code, performance and accessibility in the same pass.

Typical scope · 2–4 weeks

UI/UX sprint

Flows, high-fidelity screens, a working prototype, and a clean handoff.

Typical scope · 1–2 weeks

AI chatbot + training

A retrieval chatbot for your own documents, workflow automation, and a workshop for your team.

Typical scope · 1 week

One person. Every layer.

Working style

Design-minded, code-driven

I am Park Doly, a fullstack developer who cares about how a product feels as much as how it works. I work with founders and small teams to turn a rough idea into something people can use.

That means fewer handoffs and a tighter loop: understand the problem, shape the experience, build the system, and stay for the details that make it hold together.

Next.js · React · TypeScript · UI/UX · AI retrieval · Team training

Have a product in mind?

Let's make it useful.

Tell me what you are making, where it is stuck, and what done looks like.
