CURRICULUM VITAE

Park Doly

Fullstack developer · UI/UX designer · AI chatbots

Vietnam · GMT+7
github.com/hoangedu773
park-doly-portfolio.vercel.app

STACK

TypeScript · JavaScript · Python · Next.js · React · Node.js · Flask · HTML / CSS · LLM retrieval · Figma · UI/UX design

AVAILABILITY

Open for freelance projects. Typical scope: 1–4 weeks, fixed end date, no retainer.

ELSEWHERE

GitHub — 18 public repositories

Portfolio — selected work

PROFILE

I shape the interface and build what sits beneath it. One person from the first flow to the deployed product: Next.js front ends, Python and Node services, and retrieval chatbots that answer from a client's own documents.

SELECTED WORK

HR Blockbot — 2026

HR policy chatbot: document ingestion, retrieval answers, and a web interface for staff questions.

Python · retrieval · web UI

Rea Lab — 2025

Product site built end to end — interface design, component system, and deployment.

Next.js · TypeScript · CSS

Saigon to Coast — 2025

Editorial web build: layout, typography, and a small content model the owner can extend.

Next.js · React · TypeScript

OPEN SOURCE

chatgpt-marketing-super-kit — Python

Prompt and workflow kit for marketing tasks.

fufu-field-frontend / backend — JavaScript · Node

Paired client and server for a field-survey product.

flask-chatbot-sweetbakery — Python · Flask

Order-taking chatbot for a bakery, Flask service plus chat UI.

mathEducation — TypeScript

Practice app for maths exercises with typed content data.

ai-flask-api + ai-demo-app — Python · Flask · TypeScript

Minimal AI API and a demo client to exercise it.

agent-premire — Python

Agent experiments: tool calls, prompts, and evaluation notes.

cake-shop — TypeScript

Storefront build with product data and a checkout flow.

WHAT I DO

Web product build — 2–4 weeks

Next.js or React, design to code, performance and accessibility in the same pass.

UI/UX sprint — 1–2 weeks

Flows, high-fidelity screens, a working prototype, and a clean handoff.

AI chatbot + training — 1 week

A retrieval chatbot for your own documents, workflow automation, and a team workshop.

HOW I WORK

Understand the problem, shape the experience, build the system, then stay for the details that make it hold together. Fewer handoffs, one loop, accessibility and performance in the same pass.
